

Quarterly Network Safety Performance Report

Reporting Period: April - June 2018 (FY17/18 Q4)

		Objectives	Ind	cidents
Network	c Objectives	2017/18	Quarter	Year-to-Date
30(1)(a)	Total Electric Shock	8	0	2
	Person – No Injury	8	0	2
	Person – Injury	0	0	0
	Person – Death	0	0	0
	Livestock – Death	0	0	0
30(1)(b)	Total Property Damage (Not Fire)	0	0	0
30(1)(c)	Total Property Damage (Fire)	0	0	1

		<u>Objectives</u>	Ind	cidents
Distribut	tion Network Objectives	2017/18	Quarter	Year-to-Date
30(1)(d)	Total Network Pole Fire	9	3	5
30(1)(e)	Total Conductor Clashing	6	0	3
30(1)(f)	Total Unassisted Pole Failure	9	1	5
	Wood	4	0	3
	Steel	5	7	2
	Concrete	0	0	0
	Fibreglass	0	0	0
	Other	0	0	0
30(1)(g)	Total Unassisted Conductor Failure	7	0	6
30(1)(h)	Total Unassisted Stay Failure	2	1	9
30(1)(i)	Total Unassisted Cable Failure	4	0	12

		Objectives	Pole Failure Rate
Distribu	ution Network Objectives	2017/18	3 year rolling average*
31(3)	Total Unassisted Pole Failure Rate	1.6	0.809
	Wood x 10,000 p.a.	2.2	1.162
	Steel x 10,000 p.a.	1.3	0.679

^{*} The unassisted pole failure rate is expressed as a three year rolling average per 10,000 poles

Network Safety Performance Incident Definitions

These definitions are based on the Electricity (Network Safety) Regulations 2015

30(1)(a)	Electric Shock	A discharge of electricity from the network that causes the electric shock, injury or death of a person or the
30(1)(d)	EIECUIC SHOCK	death of livestock (excluding pets).
		An incident caused by the network, other than a fire, that
20(4)(1)	Property Damage (Not Fire)	causes damage to property other than to the network.
30(1)(b)		Includes supply, impact and arcing damage. Value of
		damage must exceed \$5,000.
		A fire caused by the network that causes damage to
30(1)(c)	Property Damage (Fire)	property other than to the network. Includes smoke and
,,,,		heat damage. Value of damage must exceed \$5,000.
20(4)(1)	D 5	A fire, on a wood pole that is a part of the network, that
30(1)(d)	Pole Fire	originated on the pole. Includes burnt cross arms.
		The contacting of 2 or more conductors of the network,
20(4)()	Conductor Clashing	of different phases, caused by temperature variations or
30(1)(e)		wind. Includes clashing due to pole lean and phase to
		earth clashing. Excludes assisted failures [see 28(c)].
		An unassisted failure of a pole that is a part of the
30(1)(f)	Unassisted Pole Failure	An unassisted failure of a pole that is a part of the network. Includes suspended failures and foundation
30(1)(f)	Unassisted Pole Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean].
30(1)(f)	Unassisted Pole Failure	network. Includes suspended failures and foundation
30(1)(f)	Unassisted Pole Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean].
30(1)(f) 30(1)(g)	Unassisted Pole Failure Unassisted Conductor Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps,
		network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network.
		network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps].
		network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the
30(1)(g)	Unassisted Conductor Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and
		network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity
30(1)(g)	Unassisted Conductor Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity in a way that impacts public safety.
30(1)(g)	Unassisted Conductor Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity in a way that impacts public safety. An unassisted failure of an underground cable that is a
30(1)(g) 30(1)(h)	Unassisted Conductor Failure Unassisted Stay Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity in a way that impacts public safety. An unassisted failure of an underground cable that is a part of the network.
30(1)(g)	Unassisted Conductor Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity in a way that impacts public safety. An unassisted failure of an underground cable that is a part of the network. Includes: joints. Excludes: terminations, lugs & cable
30(1)(g) 30(1)(h)	Unassisted Conductor Failure Unassisted Stay Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity in a way that impacts public safety. An unassisted failure of an underground cable that is a part of the network. Includes: joints. Excludes: terminations, lugs & cable accessories [e.g. clamps].
30(1)(g) 30(1)(h)	Unassisted Conductor Failure Unassisted Stay Failure	network. Includes suspended failures and foundation failure [i.e. excessive pole lean]. An unassisted failure of an overhead conductor that is a part of the network. Includes: service wires, joints. Excludes: terminations, taps, conductor accessory & line hardware failures [e.g. ties, clamps]. An unassisted failure of a stay wire that is a part of the network. Includes slack stays and failure of anchors and attachment points that compromise line design integrity in a way that impacts public safety. An unassisted failure of an underground cable that is a part of the network. Includes: joints. Excludes: terminations, lugs & cable
