## **Service Area**

#### **INTRODUCTION**

This report has been produced to meet the requirements of the Electricity Industry (Network Quality and Reliability of Supply) Code 2005, Schedule 1 – Information to be published.

To assist in meeting reporting requirements, the Economic Regulation Authority Western Australia (ERA WA) publishes the Electricity Distribution Licence Performance Reporting Handbook, which specifies measures to be reported. The report is prepared in accordance with Schedule 1 of the Code, however as Horizon Power is a vertically integrated business (responsible for generation, transmission and distribution) reliability data includes generation and transmission outages.

## **AUDIT REQUIREMENTS**

Division 3 of the Electricity Industry (Network Quality and Reliability of Supply) Code 2005 requires that Horizon Power arrange for an independent expert to audit, and report on the operation of the systems that Horizon Power has in place for monitoring its compliance with the code.

In 2017, the Minister for Energy removed the requirement for licence holders, such as Horizon Power, to annually engage an independent expert to audit and report on the operation of the systems in place for monitoring compliance with legislated electricity quality and reliability standards. The audit period was extended to three yearly. The previous audit was undertaken for the 2020 report and an audit will be conducted in 2023.

## Schedule 1 - Information to be published

Clause 3: Stand-alone Power Systems (SPS)

Total Number of Complaints received from customers for each discrete area's SPS:

| Discrete Area SPS | 2021/22 | 2022/23 |
|-------------------|---------|---------|
| Carnarvon SPS     | N/A     | 0       |
| Esperance SPS     | 0       | 0       |
| Exmouth SPS       | 0       | 0       |
| Hopetoun SPS      | 0       | 0       |
| Horizon Power     | 0       | 0       |

Average Length of Interruption of Supply to Customer Premises in Minutes (CAIDI)

| System              | 2019/20 | 2020/21 | 2021/22 | 2022/23 | Average |
|---------------------|---------|---------|---------|---------|---------|
| Carnarvon SPS       | N/A     | N/A     | N/A     | 436.00  | 436.00  |
| Esperance SPS       | N/A     | 0.00    | 286.67  | 411.30  | 232.66  |
| Exmouth SPS         | N/A     | 0.00    | 0.00    | 271.00  | 90.33   |

#### Clause 4 and 10 – Breaches and Remedial Action

Clause 4(a) Number of breaches of each provision of the Code:

| Quality of Supply             | 2021/22 | 2022/23 |
|-------------------------------|---------|---------|
| Voltage fluctuations          | 0       | 0       |
| Harmonics                     | 0       | 0       |
| Failure to Notify Customer of | 5       | 0       |
| proposed interruption –       |         |         |
| Sections 9 and 11(b)          |         |         |

Clause 4(b) Remedial action taken for each provision:

### **Voltage Fluctuations**

| Location | Action Taken |
|----------|--------------|
| N/A      | N/A          |

#### **Harmonics**

| Location | Action Taken |
|----------|--------------|
| N/A      | N/A          |

N/A = Not Applicable.

Continuous monitoring of voltage and frequency fluctuations is done at the substation busbar. Temporary power quality monitoring equipment is installed on the network for specific problem monitoring in response to a customer power quality complaint.

Clause 5 - Significant interruptions to small use customers

| Clause Description  | 2021/22 | 2022/23 |
|---|---------|---------|
| Clause 5(a) Number of premises that experienced interruptions | 522     | 1329    |
| greater than 12 hours continuous                              |         |         |
| Clause 5(b) Number of premises that experienced more than 16  | 199     | 843     |
| interruptions.  |         |         |

The number of premises experiencing more than 16 interruptions increased mainly in Esperance, Halls Creek, Mount Magnet and Carnarvon areas.

Detailed information of interruptions where duration is greater than 12 hours (720 minutes) continuously for 2022/23 is outlined in the table below:

| System     | Duration<br>(Minutes) | Premise<br>s | Start Date | Cause Description               | Incident<br>Category         |

## 4. MAJOR EVENT DAYS

In the period 01/07/2022 to 30/06/2023 the following systems were impacted by significant weather events for which Major Event Days were recorded.

| System           | Major Event Days | Event                                   |
|------------------|------------------|---|
| Fitzroy Crossing | 4 January 2023   | Flooding from Ex-Tropical Cyclone Ellie |
| Looma            | 7-8 January 2023 | Flooding from Ex-Tropical Cyclone Ellie |
| Halls Creek      | 14 January 2023  | Flooding from Ex-Tropical Cyclone Ellie |

## 5. Appendix A

#### **Major Event Days**

Major event days are days in which interruptions affect the delivery of supply in a system and are not reasonably practicable to control such as extreme weather events (cyclones, fires and floods). These days are excluded from Sustained Interruptions used for reliability measurement and reporting.

This report makes reference to the impact of major event days where they have had a significant impact on the statistics.

#### Major Event Day Classification

The classification of Major Event Days is to allow major events to be studied separately from daily operation, and in the process, to better reveal trends in daily operation that would be hidden by the large statistical effect of major events.

A Major Event Day is a day in which interruptions affect the delivery of supply in a system that is not reasonably practicable to control. All indices are calculated based on removal of the identified Major Event Days.

Interruptions that span multiple days are accrued to the day on which the interruption begins.

#### Normalised Data Set - Unplanned

Horizon Power uses Normalised data set to measure the management of incidents that are within the business' control.

Sustained Interruptions in Horizon Powers systems are those interruptions that result in a loss of electricity to customers for more than one minute in duration.

Horizon Power's Normalised Data excludes interruptions where the interruption is not reasonably practicable to control such as:

- Customer installations/ appliances
- Planned outages/ disconnections
- Vehicle, machine or tool damage
- Wilful damage
- Damage due to events that Horizon Power cannot, so far as is reasonably practicable, control such as cyclones, fires and floods.

As Horizon Power is a vertically integrated business (responsible for generation, transmission and distribution) reliability data includes generation and transmission outages.
